

Part Number	Description	Part Number	Description
13001	<p>ANTI RUST PROTECTANT</p> <p>Specifically formulated to protect all your metal hard parts from rust & corrosion. Prolonged exposure to air causes metal to oxidize which forms rust & corrosion. Rust weakens metal which can cause parts failure. Protect & prolong the shelf life of hard parts.</p> 	4001	<p>SYNTHETIC ATF PROTECTANT</p> <p>A universal synthetic protectant designed for use with all automatic transmissions. Protectant utilizes synthetic technology used in original equipment manufacturers factory fills. Allows transmission to run cooler, longer & smoother by softening hard shifts, preventing torque converter lock-up shudder & frees sticking valves.</p> 
15001	<p>ENGINE PRIMER KIT</p> <p>Innovative product was designed as a solution for the problem of dry start-ups in new and rebuilt engines. By injecting primer into the engine block rebuilders, sellers & installers can be assured of reduced internal parts wear caused by dry start-ups. This reduced wear is due to ALL internal parts being properly lubricated before the engine is cranked.</p> 	5001	<p>ASSEMBLY LUBRICANT</p> <p>Specifically designed for automatic or manual transmission assembly. Lubricates o-rings, gaskets, bearings, bushings, sealing rings, thrust washers & seals during assembly. Unique blue color prevents misdiagnosing leaks. Lube will not melt at shop temperatures up to 135 degrees & is formulated to dissolve quickly at operating temperatures, therefore not clogging filters. Compatible with all transmission fluids.</p> 
2001	<p>COOLER FLUSH</p> <p>Specifically formulated to prevent automatic transmission cooler contamination (metal shavings, sludge, etc) by propelling a biodegradable cleaner through the transmission cooler & lines with 90lbs of pressure. Patented technology is OEM approved and ideal for installers & ship out transmissions.</p> 	7001	<p>VALVE BODY / GOVERNOR CLEANER</p> <p>Designed for use in transmissions & other mechanical rebuilds. Anti-seize cleaner is specifically formulated to clean & coat automatic transmission valves & free governors. Improves quality control & reduces costly comebacks.</p> 
3100	<p>SURE GRIP CLEAR</p> <p>Premium anti-slip epoxy coating that works on hard, smooth or textured surfaces. Anti-slip coating works on interior and exterior surfaces under wet or dry conditions. Chemically resistant to oils, gasoline, water & other solvents. Apply to concrete, steel, wood, fiberglass, aluminum & other surfaces where a slip resistant surface is needed. Easy to use & quick drying.</p> 	9001	<p>ELECTRONIC CLEANER</p> <p>2-in-1 electronic cleaner (solvent) with Dielectric Protection that instantly removes oil, grease, dirt, flux & other contaminants while leaving a thin layer of dielectric protectant that helps prevent contact failure, voltage leakage and malfunction. Used on electronic transmissions, engines & computers will prolong the life of the connection. Cleaner is harmless to plastics and paper tapes.</p>
