

How to Identify a Carraro Transmission?

1st) How do I know if I have a Carraro transmission in my machine?

Carraro transmissions are fitted with a rectangular metal identification plate located on the side of the unit.

2nd) When I find the Carraro ID plate, what am I looking at?

 CARRARO	
TRANSMISSION TYPE	SERIAL N.
<input type="text"/>	<input type="text"/>
CARRARO N.	CUSTOMER N.
<input type="text"/>	<input type="text"/>
OIL SPECIFICATION	LIT.
<input type="text"/>	<input type="text"/>
MADE IN ITALY	

Each Carraro unit is given a unique identification plate for displaying its individual characteristics, sort of like a birth certificate. The plate will include all the necessary model, serial and part number information to properly identify your Carraro transmission.

3rd) Now that I have identified my Carraro transmission, where can I get parts or service?

That's where we come in. You can give us a call, fax or email us a description or picture of the tag and we'll take it from there. By utilizing our extensive database of Carraro parts and in depth product knowledge, a Joseph Industries sales team member will be able to assist you with your needs, whether it is for:

- Genuine Carraro Transmission Parts
- Transmission Remanufacturing Services
- Transmission Overhaul Kits
- Genuine Carraro Transmission Components
- Torque Converter Remanufacturing Services
- Technical and Performance Assistance

Carraro transmissions are commonly found in:
